Bayan Al Qatanani

Flutter Developer & UI/UX Designer | Figma | Mobile & Web Apps

Amman, Jordan | +962 79 073 0145 | bayanqatanani23@gmail.com | linkedin.com/in/bayan-qatanani-350a54255 | github.com/bayanqat | Portfolio: bayanqat.github.io

PROFESSIONAL SUMMARY

Flutter developer and UI/UX designer who takes apps from Figma design to Flutter build. Designed the full mobile and web UI of Lussito, a live e-commerce app, and built its API integration; single-handedly designed and developed a production alumni social network. Ships bilingual Arabic/English (RTL) apps to the App Store and Google Play using Clean Architecture, BLoC and GetX. Featured on Jordan Television as a participant in the Tariqi employability project.

TECHNICAL SKILLS

- **UI/UX Design (Figma):** Figma, mobile app UI design, user flows, e-commerce and checkout flows, responsive web layouts (desktop and mobile), Arabic/English RTL interface design, design-to-development handoff
- **Development:** Dart, Flutter, Flutter Web
- **Architecture & State:** Clean Architecture, BLoC/Cubit, GetX, Provider, get_it, go_router, deep linking
- **Networking & Data:** REST APIs (Dio, http), WebSockets, freezed/json_serializable, SharedPreferences, get_storage, sqflite
- **Integrations:** Firebase (Messaging, Remote Config), push notifications, MPGS card payments, Google Maps & geolocation, QR generation & scanning
- **Localization & Delivery:** Arabic/English with RTL, testing, Git, Postman, Swagger, App Store & Play Store releases

PROFESSIONAL EXPERIENCE

Dot Media / Dot Tech, Amman, Jordan

Junior Mobile App Developer — Jan 2026 – Jul 2026

- Designed the full mobile and web UI of **Lussito**, an abaya e-commerce app, in Figma. In Flutter (BLoC), built about half of the screens and the API integration: MPGS card payments with saved cards, cash on delivery, OTP auth, wishlist, coupons, body measurements, and product search.
- Designed **Bishop School Alumni Club**, an alumni social network, in Figma, including the redesigned profile page, and single-handedly handled the entire development and all UI changes: post feed with polls, real-time chat with read receipts, event QR tickets, voucher redemption, membership payments, and admin tools.
- Designed **dotGate** (workforce and attendance) and **Dot Projects** (client, project and sales management) in Figma.
- Developed the lease contract flows for **Musaddaq**, a lease contract certification platform: contract creation, payment dues, terminated contracts and search, certified certificates, delegation, and Arabic-first localization across 40+ screens.
- Built the **Musaddaq** responsive web version (desktop and mobile) from the same Flutter codebase in one week.
- Added push notifications, order filters and pull-to-refresh to **Jet App**, a duty-free shopping app, and fixed UI overflow bugs.
- Updated the UI of **Daleel AlHurra**, a car marketplace directory, and worked on **Masrafy** (personal finance).
- Live on the App Store and Google Play (details on page 2):
  - **Lussito** [iOS, Android]
  - **Musaddaq** [iOS, Android]
  - **Daleel AlHurra** [iOS, Android]
  - **Bishop School Alumni Club** [iOS, Android]

Mobile App Developer Trainee — Nov 2025 – Dec 2025

- Built **Musaddaq** UI screens and connected them to the REST API, then took on contract creation.

Coderz Company, Amman, Jordan

Mobile App Developer Intern — Jul 2025 – Sep 2025

- Built live order tracking with Google Maps and real-time location, plus ordering and delivery flows with BLoC and Clean Architecture, for an on-demand food delivery app.

EDUCATION

B.Sc. Software Engineering, Philadelphia University, Amman — Feb 2025

GPA: 86.7 / 100 (Excellent)

TRAINING, CERTIFICATIONS & RECOGNITION

- **Mobile Application Development Course using Flutter**, Princess Sumaya University for Technology (PSUT), Sep – Oct 2026
  - Acted as an informal peer mentor: regularly helped fellow trainees and explained Flutter concepts to them in simple terms.
- Full Stack Mobile App Development, Talal Abu-Ghazaleh Organization, 2025
- Full-Stack Mobile App Development (FunDev), Coderz Company, 2025: mobile app UI/UX design, Flutter, and state management
- **Tariqi Project**, King Abdullah II Fund for Development (KAFD), implemented by the Business Development Center (BDC) in partnership with The King's Trust International, 2025
  - Youth employability program running since 2015 that prepares Jordanian graduates for the job market through life skills, technical training and on-the-job placement; my training focused on employability and teamwork.
  - **Featured in a Jordan Television interview**, arranged by the Tariqi project and the King Abdullah II Fund for Development, sharing my experience as a program participant. Watch the interview

LANGUAGES

Arabic: Native | **English:** Professional working proficiency

Project Portfolio

Bayan Al Qatanani | Flutter Developer & UI/UX Designer | Portfolio: bayanqat.github.io

UI/UX DESIGN PROJECTS (FIGMA)

Lussito – Abaya E-commerce App (Mobile & Web) [iOS, Android]

Figma | Dot Tech | 2026 | Role: UI/UX designer

- Designed the complete mobile and web interface: product browsing, product search, wishlist, coupons and body measurements.
- Designed the end-to-end checkout flow, covering card payment with saved cards and cash on delivery, plus OTP sign-in.
- Built responsive web layouts and bilingual Arabic/English (RTL) screens, then handed them off and built part of them myself.

Dot Projects – Client & Project Management App

Figma | Dot Tech | 2026 | Role: UI/UX designer

- Designed the client side: onboarding, home overview, project timeline by status, project files, and invoices with overdue alerts.
- Designed owner and sales dashboards (revenue, projects, deadlines, meetings) and CRM screens for clients, leads and proposals.

dotGate – Workforce & Attendance App

Figma | Dot Tech | 2026 | Role: UI/UX designer

- Designed fingerprint check-in with a daily hours summary, leave and remote-work requests, and request history with approval states.

Bishop School Alumni Club – Alumni Social Network [iOS, Android]

Figma | Dot Tech | 2026 | Role: designer and sole developer

- Designed the app in Figma, including a redesigned profile page, and carried every design change through to the Flutter build myself.
- Covered the screens for the post feed with polls, real-time chat, event QR tickets, voucher redemption and membership payments.

FLUTTER DEVELOPMENT PROJECTS

Shoply – E-commerce App (Final Project, PSUT Flutter Course) [GitHub]

Flutter, Clean Architecture, Cubit, Firebase Auth, Cloud Firestore, freezed, dartz | Oct 2026

- Built a complete shopping app solo: categories and products, product details, favorites, cart with checkout, and order tracking with statuses (Pending, Approved, Delivered) and All / Active / Completed filters.
- Implemented full Firebase auth: sign-up with profile photo, email verification, password reset and change, and profile updates.
- Structured 20+ feature modules in data, domain and presentation layers with use cases and Either-based error handling; added in-app order notifications, tab badges and light/dark mode.

Shop App – Mid-term Exam Project (PSUT Flutter Course) [GitHub]

Flutter | Sep 2026

- Built login and forgot-password screens with regex form validation, a product catalog with a grid/list view toggle, and product details, connected through named routes and reusable custom widgets.

Lussito – E-commerce App [iOS, Android]

Flutter, BLoC, REST API, MPGS | Dot Tech | 2026

- Built about half of the screens and the full API integration.
- Integrated MPGS card payments with saved cards, cash on delivery, OTP auth, wishlist, coupons, measurements and search.

Bishop School Alumni Club – Social Network [iOS, Android]

Flutter, WebSockets, QR, Payments | Dot Tech | 2026 | Single-handed development

- Developed the entire app alone: polls feed, real-time chat with read receipts, event QR tickets, vouchers, payments and admin tools.

Musaddaq – Lease Contract Certification Platform (Mobile & Web) [iOS, Android]

Flutter, Flutter Web, REST API | Dot Tech | 2025–2026

- Developed lease contract flows: creation, payment dues, terminated contracts and search, certified certificates and delegation.
- Delivered Arabic-first localization across 40+ screens.
- Built the responsive web version (desktop and mobile) from the same Flutter codebase in one week.

Jet App – Duty-free Shopping

Flutter, Firebase Messaging | Dot Tech | 2026

- Added push notifications, order filters and pull-to-refresh, and fixed UI overflow bugs.

Daleel AlHurra & Masrafy [iOS, Android]

Flutter | Dot Tech | 2026

- Updated the UI of Daleel AlHurra (car marketplace directory) and contributed to Masrafy (personal finance).

On-demand Food Delivery App

Flutter, BLoC, Clean Architecture, Google Maps | Coderz Company | 2025

- Built live order tracking with Google Maps and real-time location, plus the ordering and delivery flows.

Blood Bank Management System – Graduation Project

Flutter (mobile & desktop) | Philadelphia University | 2025

- Multilingual app with location-based donor search.

Admin Panel Web App

Flutter Web

- Updated an administrative dashboard for orders, users and analytics.
